

Octa Divine with diamonds

A worthy heir to the Octa collection, the OCTA DIVINE (36mm) is the first model by F.P. Journe-Invenit et Fecit - to be set with diamonds and feature centre hour and minute hands. Nonetheless, the recognisable F.P. Journe aesthetic elegance has been retained, with the seconds circle in the lower right-hand section, and the hour and minute circles screwed to the dial, a brand-specific feature that has been duly patented. This watch indicates the power-reserve and displays the moon phases thanks to a metallic sapphire disc which moves one notch forward when the date changes. The bezel is set with loupe-clean DE Top River diamonds, as is the folding clasp or pin buckle.

Technical information :

- Platinum case with a diameter of 36mm, set with a total of 2.61 carats
- Diamond-set dial, 0.5 carats
- Automatic winding movement, 120-hour power-reserve
- 21,600 vibrations per hour

Octa Divine without diamonds

A worthy heir to the Octa collection, the OCTA DIVINE (36mm) is the first model by F.P. Journe-Invenit et Fecit - to be set with diamonds and feature centre hour and minute hands. Nonetheless, the recognisable F.P. Journe aesthetic elegance has been retained, with the seconds circle in the lower right-hand section, and the hour and minute circles screwed to the dial, a brand-specific feature that has been duly patented.
