

New Havana Dial for the Chronomètre Souverain

The Chronomètre Souverain now features a new Havana dial.

F.P.Journe has created a warm-coloured dial that perfectly matches the 40mm platinum cases and the caramel alligator strap of the Chronomètre Souverain.

The dial colour is unique to F.P. Journe, a result of the company's well-tended independence, which ensures its creative freedom. It was developed by Journe's own dial makers, Les Cadraniers de Genève, in a process lasting several months. In essence, it is a combination of gold and ruthenium. But to get the colour just right required many adjustments to the formula.

Inspired by early 19th-Century marine chronometry, the 18K rose Gold movement of the Chronomètre Souverain features 2 barrels, in the classic configuration of precision watches that work in parallel to deliver a strong and stable power for an unequalled precision.

This watch is also available on a Platinum bracelet and exclusively in the F.P.Journe Boutiques.
