ADJUSTABLE FOLDING CLASP
ACCESSORIES

Adjustable folding clasp

Platinum or 6N 18 K Gold.
Adjustment disk diameter: 24.60 mm
360° rotation
Patent: EP 1 981 365

Inspired by the knurled silk cord pattern of their timepieces' winding crowns, F.P. Journe designed a buckle that allows for quick and effortless strap adjustment. Featuring a rotating mechanism, it enables the pin to be set in eight distinct positions, each spaced 1 mm apart. This rotation occurs around the buckle's closing center, allowing for an 8 mm extension.
