ÉLÉGANTE BY F.P.JOURNE TITALYT®

AN INNOVATIVE GEM WITH A STRONG PERSONALITY

The élégante by F.P.Journe is now also housed in a grade 5 Titanium case with an exclusive Titalyt® treatment that enhances its identity within the élégante collection by F.P.Journe. The procedure, in which Titanium is subjected to electro-plasma oxidation, improves the material's hardness and resistance to wear and corrosion. This new version, recognisable due to its unique colour, has a stylish look that flatters all styles - casual, sports chic, or formal. It is available in 2 versions - 40 mm and 48 mm, satisfying everyone's preferences.

In the dark, the luminescent dial of the Titanium version offers optimal legibility while the hands indicate the time as in a shadow play. During the day, it has the beautiful gleam of white mother of pearl.

It took 8 years of research for F.P.Journe to develop this revolutionary horological concept with extremely precise requirements, leading to this innovative horological concept. Fitted with a revolutionary electromechanical movement, the **élégante by F.P.Journe** provides more than 8 years autonomy with the performance of a watch that is exceptionally comfortable to wear. After remaining motionless for 35 minutes, the watch switches to standby mode in order to save energy, and its hands stop turning. In standby mode, the microprocessor specially created for this watch continues to measure the time. When the motion detector visible on the dial at 4h30 is activated, the élégante automatically sets itself to the correct time, with the hands taking the shortest path, whether clockwise or counter-clockwise. The élégante by F.P.Journe allows time to be stopped and started again - the absolute dream of all watchmakers. Magical!

Combining tradition and modern technology, the élégante by F.P.Journe embodies the magic inherent to all F.P.Journe creations. It surely makes its mark on horological history.

The élégante Titalyt® is available in the 9 F.P.Journe Boutiques, the 7 Espaces as well as from F.P.Journe authorized retailers.

Technical Specifications

Movement_	
Calibre 1210	
Electromechanical	
Patented two-rotor motor.	
Dedicated processor, specific functions and low consumption.	
Quartz frequency: 32'768 Hz.	
Movement dimensions_	
Overall dimensions:	28.5 x 28.3 mm
Casing-up:	27.9 x 27.7 mm
Overall Height:	3.13 mm
Height of winding stem:	1.10 mm
Diameter of stem thread:	S 0.90 mm
Particularities _	
Standby after 35 minutes motionless	
Restart and automatic time setting when the watch is put back on	
Motion detection oscillating weight visible on the dial	
2 positions hand setting stem	
Main characteristics_	
Time adjustment in position 2 of the hand-setting stem	
Stop second in time setting position (crown pulled)	
Autonomy_	
Daily use:	8 to 10 years
Standby:	18 years
Indications_	
Central hours and minutes	
Small second at 6h00	
Dial_	
Inner dial in luminescent sapphire	
Outer dial with screwed Steel elements	

Finishing_	
4N Gold movement	
Engraved and decorated battery bridge	
Côtes de Genève	
Screw heads polished and bevelled	
Pegs with polished rounded ends	
Case_	
Titanium with Titalyt® treatment 40 mm	
Set with 38 diamonds VVS F/G for 0.50 carat	
Flat Tortue®:	35 x 40 mm
Total thickness:	7.35 mm
Sapphire crystal case back	
Titanium with Titalyt® treatment 48 mm	
Flat Tortue®:	40 x 48 mm
Total thickness:	7.95 mm
Sapphire crystal case back	
Crown_	
Screw down in Titanium with Titalyt® treatment	
Water resistance_	
3 ATM	
Bracelet_	
Rubber with deployant clasp	
Number of pieces_	
Jewels:	18
Movement without dial:	129
With case and strap:	162
